Sure-Chek™ **Antimicrobial Fabric Protection**

Vinyl Covered Fabric 9 oz.

Flame Resistant

Sure-Chek resist combustion and will self-extinguish when the source of flame is removed.

Stain Resistant

Most oils, greases, and contaminants may be wiped off with soap, water or mild cleaners.

Antistatic

Sure-Chek is specially formulated with an enduring antistatic property, "Anstat®." It prevents the build-up or retention of electrostatic charges that could interfere with the functioning of sensitive life support equipment.

Odor Resistant

Sure-Chek is treated to resist bacterial odors. Objectionable organic odors are decreased as a result of the active protection against odor-forming bacterial growth on Sure-Chek's surface.

Durable

Sure-Chek is incredibly strong, withstanding severe wear and abuse. Extra strength and tear resistance mean extended material life.

Antimicrobial to protect the fabric

A controlled release system continually sends the antimicrobial agent to the fabric surface. This built-in protection lasts the life of the fabric. It is not a superficial treatment.
